

STALWART IS[®]

ANTI-RAM BARRIER + SECURITY FENCE

Stalwart IS unites the *strongest security fence available* with the *most widely used anti-ram perimeter barrier*. The appearance of Stalwart IS is a *great visual deterrent* that delivers strength and fortitude for keeping any assailant from easily breaching the perimeter.

DESIGN INTEGRATION

The Stalwart IS framework is a raceway for wiring, conduits, and/or security cabling required around the perimeter of a project. This integrated design eliminates the need for costly trenching and boring becoming a value added solution for perimeter security upgrades.

(inside of rail shown / view from protected side)

When installing these security elements use Stalwart IS as a platform:

- **Communication & Video Cables**
- **Intrusion Detection / Fiber Optic Cables**
- **Access Control Wiring**
- **Conduits**
- **Anti-Ram Cabling (Stalwart)**

PRIMARY APPLICATIONS

- **Military Sites**
- **Petroleum & Chemical Facilities**
- **Power Plants & Substations**
- **Government Facilities**
- **Airports**
- **Ports of Entry**
- **Data Centers**
- **Water Treatment & Storage**

FABRICATION & DESIGN

The Stalwart IS system is manufactured of high-tensile steel and is pre-galvanized inside and out for superior corrosion protection. Each component has been roll-formed into a unique profile that yields significant strength properties to encourage an anti-climb and anti-cut perimeter barrier. Each connection point of the Stalwart IS system is secured with tamper-proof fasteners providing the highest level of security and versatility.

PERMACOAT™ PROTECTIVE FINISH

Ameristar's production facility uses a state-of-the-art polyester powder coating system that provides a durable and scratch resistant finish. This PermaCoat process has a dual-coat finish, which yields the best results for durability and weathering in the industry. These finished components can endure over 3,500 hours of salt spray testing; proving our claim of long-lasting durability.

CRASH RATINGS

Stalwart IS offers multiple anti-ram ratings. Each installation can be designed with most the appropriate stand-off distance from the assets.
